Detroit Diesel Fuel Filter Kits

The MAHLE® KX 400/1 KIT and KX 469/10 KIT fuel filter kits are available to service the Detroit® Diesel DD13®, DD15®, and DD16® engines. These fuel filters use patented technology, allowing for easier filter removal and less mess. The KX 469/10 KIT utilizes a sword design to guide the filter during installation and the need to disengage the whole housing isn't required.

These filter kits include:

- Fuel filter
- O-rings
- Basket Strainer – traps smaller particles which were not filtered out by the filter itself
