

MAHLE TechPRO[®] diagnostic tool now available in Europe

- Ready-to-start vehicle diagnostics within just seven seconds
- Displays error codes quickly
- Compact design and intuitive operation
- Almost 90 percent coverage for all vehicles in Europe

Stuttgart, February 25, 2019 – MAHLE's diagnostic tool TechPRO[®] is now available for European customers. This is MAHLE's response to the increasing market demand — devices that boot quickly, supply rapid results, are intuitive to operate, and can be used economically over the entire service life of the device.

TechPRO[®] recognizes all error codes within 30 seconds on average. The Linux-based system communicates with all the modules fitted in the vehicle and responds to over 54,000 detailed OEM error code descriptions. It stores all the data protocols locally, thus offering subsequent output if required, without having to reconnect to the vehicle.

The tried-and-tested touch screen provides for simple, intuitive operation of the diagnostic system — from the current vehicle status to guided troubleshooting to relevant component coding. Thanks to integrated Wi-Fi, regular software updates are carried out automatically via the Internet so that TechPRO[®] is always up-to-date.

“With MAHLE TechPRO[®], we are taking a further step toward digitization and connectivity, and offering the user real added value when it comes to time spent, operability, and economic efficiency,” explains Olaf Henning, Corporate Executive Vice President and General Manager MAHLE Aftermarket.

MAHLE TechPRO[®] fulfils every wish and provides the most up-to-date and fastest diagnostics technology for professional users. Technical details and information specific to the vehicle, such as a wiring diagram or the status display, enable a rapid result-oriented diagnosis.

Benefits from TechPRO[®] for A/C service and recalibration of assistance systems as well

Workshops can combine TechPRO[®] with the new A/C service units from MAHLE and BRAIN BEE. The new diagnostics solution from MAHLE can also be combined with the revolutionary TechPRO[®] ADAS tool for fast, easy recalibration of driver assistance systems.

About MAHLE

MAHLE is a leading international development partner and supplier to the automotive industry as well as a pioneer for the mobility of the future. The group's product portfolio addresses all the crucial issues relating to the powertrain and air conditioning technology—both for drives with combustion engines and for e-mobility. In 2017, the group generated sales of approximately EUR 12.8 billion with about 78,000 employees and is represented in more than 30 countries with 170 production locations.

About MAHLE Aftermarket

MAHLE Aftermarket, the business unit specializing in spare parts, uses the expertise from the series production of original equipment in its automotive aftermarket product range and supplies trade, workshop, and engine repair partners. The portfolio also includes products developed by MAHLE Service Solutions for workshop equipment as well as comprehensive services and customized training programs. The full extent of this expertise is found in the MAHLE, BRAIN BEE, BEHR, CLEVITE, IZUMI, KNECHT FILTER, and METAL LEVE brands.

MAHLE Aftermarket is represented at 25 locations and other sales offices worldwide, with around 1,600 employees. In 2017, the business unit achieved a global sales volume of over EUR 950 million.
