

MAHLE at Automotive Testing Expo 2019

- MAHLE Service Solutions presents itself to the sector as a solutions provider for end-of-line testing and repair bay technology
- Thirty years of experience, and 50 million vehicles tested each year in production facilities and workshops

Stuttgart/Germany, May 21, 2019 – From May 21 to 23, MAHLE will appear at Stand 8438 in Hall 8 of Automotive Testing Expo 2019 in Stuttgart, where it will present itself as an agile heavyweight in the field of vehicle diagnostics. With over 30 years of experience and more than 50 million vehicles tested each year, MAHLE is setting new standards—for end-of-line testing in production plants, reworking in repair bays, and in auto workshops.

At the trade fair in Stuttgart, the focus will be on MAHLE's solutions for testing a wide variety of systems. The company's technology plays an important role right from the very first seconds of a car's life: MAHLE's LogiqPRO system performs the initial programming of control units entirely autonomously during production. In the process, up to 250 functions can be tested simultaneously in under two minutes. Any vehicles showing anomalies are sent to the repair bay, a production area where deviations are corrected.

"The repair bay is where the strengths of many of our workshop solutions really lie, whether it be in changing fluids, performing an air conditioning service, or calibrating driver assistance systems," explains Olaf Henning, Corporate Executive Vice President and General Manager MAHLE Aftermarket.

To encourage dialog about these strengths and join the sector in identifying optimization opportunities, MAHLE will be showcasing several of its innovations. These include the MAHLE TechPRO®

Digital ADAS calibration tool, which features a digital calibration panel on a flat-screen display. In addition to automatically storing tables for new vehicle types when the system is updated, calibration takes only a few seconds, is straightforward, and is far less demanding in terms of the exact positioning of the vehicle, compared with competing products. The new generation of MAHLE ACX A/C service units will also be exhibited at the stand. The hallmarks of this product include robust design, simple operation, and intelligent components offering excellent connectivity.

About MAHLE

MAHLE is a leading international development partner and supplier to the automotive industry as well as a pioneer for the mobility of the future. The group's product portfolio addresses all the crucial issues relating to the powertrain and air conditioning technology—both for drives with combustion engines and for e-mobility. In 2018, the group generated sales of approximately EUR 12.6 billion with more than 79,000 employees and is represented in more than 30 countries with 160 production locations.

About MAHLE Aftermarket

MAHLE Aftermarket, the business unit specializing in spare parts, uses the expertise from the series production of original equipment in its automotive aftermarket product range and supplies trade, workshop, and engine repair partners. The portfolio also includes products developed by MAHLE Service Solutions for workshop equipment as well as comprehensive services and customized training programs. The full extent of this expertise is found in the MAHLE, Brain Bee, BEHR, CLEVITE, IZUMI, KNECHT FILTER, and METAL LEVE brands.

MAHLE Aftermarket is represented at 25 locations and other sales offices worldwide, with around 1,700 employees. In 2018, the business unit achieved a global sales volume of over EUR 928 million.
