

MAHLE

Our heart beats for
thermal management.

Yesterday, today, and tomorrow.

BEHR[®]

Behr Hella Service becomes MAHLE.

From January 1, 2020, Behr Hella Service will be known as MAHLE. You'll probably have some questions about this. First, the most important thing: from 2020, you'll find all your thermal management spare parts in our sales brand BEHR under the umbrella brand MAHLE, plus workshop equipment and diagnostics as well as other services from a single source. With MAHLE, you have a strong new partner and expert by your side for everything relating to air conditioning and cooling: from passenger cars, commercial vehicles, delivery vans, and construction and agricultural machinery through combustion engines, hybrid drives, and electric drives. What this means for you is even higher workshop quality, thanks to MAHLE's original equipment competence. You'll also be ideally equipped for the future. After all, precise thermal management is not only a prerequisite for the reliable operation both of combustion engines and of electric vehicles, but also a critical factor in fuel cell technology. Sounds good? In this brochure, you'll find out which products, solutions, and services you can obtain specifically from MAHLE Aftermarket as of 2020.

Hello, future!

To succeed in the future, you need to be future proof. With strong, strategic partnerships, for example. When you work as a team, you can achieve so much more.

MAHLE's acquisition of Behr Hella Service is a logical step forward that allows us to offer workshops and trade even better support when it comes to new mobility concepts. The two product ranges complement each other perfectly, and together we can provide seamless coverage in the areas of air conditioning and cooling for all drive types.

You'll have easy and quick access to all the products and solutions that you need for your work. Besides spare parts, these also include air conditioning service units

and diagnostics, technical training, and repair and maintenance information. After all, efficient thermal management is set to play an ever-greater role in the future—for all powertrain technologies.

In short, whether there's a hum or a buzz under the hood, MAHLE Aftermarket offers everything you need to keep your business fit for the future, even when it comes to thermal management.

More than 9,000 quality parts

With more than 9,000 high-quality items in around 25 product groups, MAHLE Aftermarket completely covers the areas of air conditioning and cooling.

Efficient thermal management is becoming increasingly important. Our acquisition of Behr Hella Service allows us to offer workshops optimal support and help them achieve success.

Olaf Henning
Corporate Executive Vice President and General Manager MAHLE Aftermarket

The advantages are evident.

Advantage for existing Behr Hella Service customers

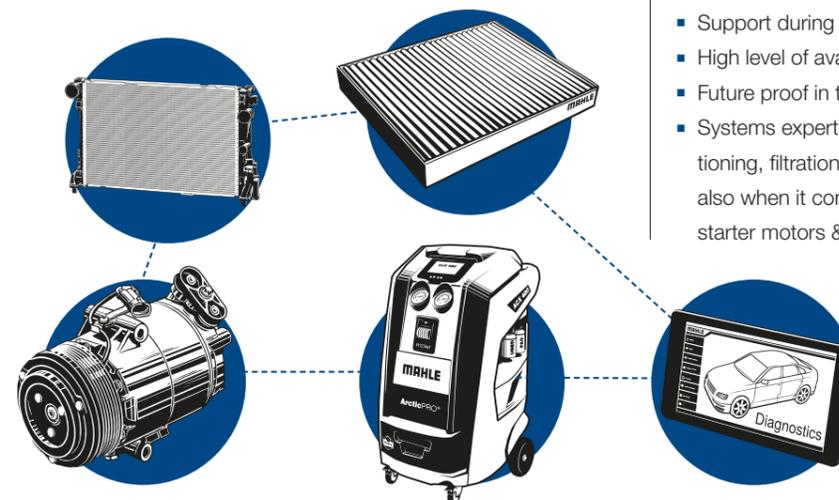

- Direct access to the complete MAHLE Aftermarket range in original equipment quality

Advantage for existing MAHLE customers

- All thermal management products and solutions now available from a single source

Advantages for all customers

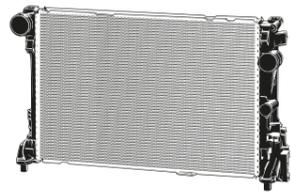

- Support during the entire transition process
- High level of availability
- Future proof in the area of thermal management
- Systems expertise not just for engine cooling & air conditioning, filtration, workshop equipment, and diagnostics but also when it comes to engine components & turbochargers, starter motors & alternators, and e-mobility & electronics

Extensive expansion of the range from 2020.

From 2020, you'll receive all your thermal management spare parts in our BEHR sales brand under the umbrella brand MAHLE. In addition, you can make use of a number of services to help you achieve success, such as technical training, maintenance information, how-to and installation videos, and a ticketing system.

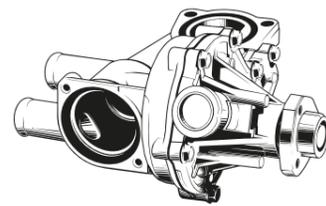

Engine cooling

Coolant coolers

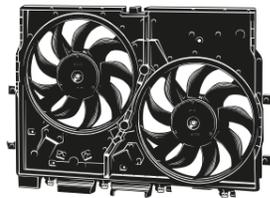

Expansion tanks

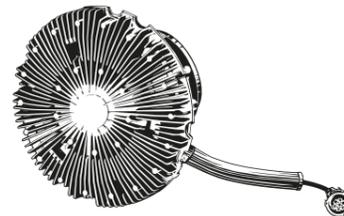

Water pumps and kits

Cabin heat exchangers

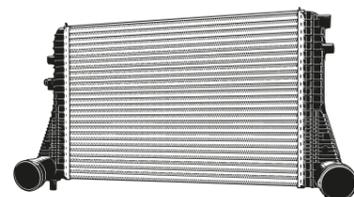

Coolant coolers/
condenser fans

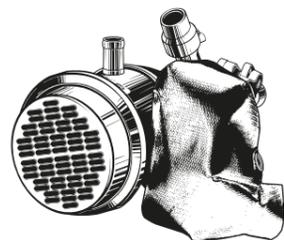

Visco® fan drives/
fan clutches

Oil coolers

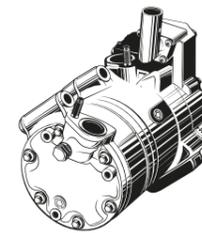

Charge air coolers

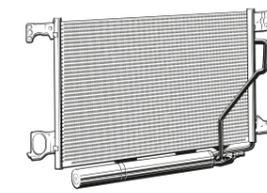

Exhaust gas
recirculation coolers

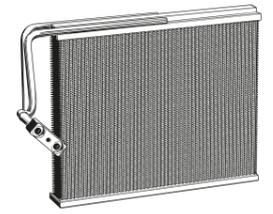

Automotive air conditioning

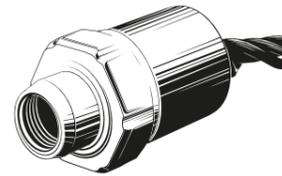

A/C compressors

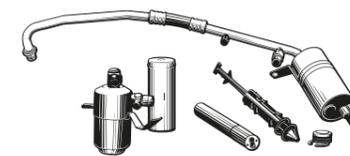

A/C condensers

Evaporators

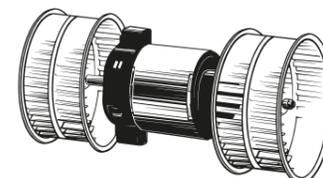

A/C switches

Filter-driers
and accumulators

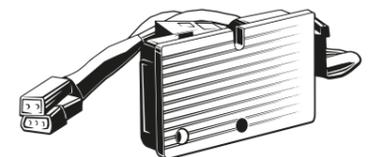

Expansion valves
and orifice tubes

Interior blowers

A/C compressor oils

A/C blower regulators
and resistors

Do you have any questions? We've got the answers!

The acquisition of Behr Hella Service by MAHLE Aftermarket is bound to raise a lot of questions. "What will change for me?" a number of Behr Hella Service customers have asked us. "What improvements will we see?" MAHLE customers ask themselves.

Why is the topic of thermal management so important for the future of a workshop?

Thermal management is a key technology for any drive type. It improves the efficiency of combustion engines. In electric vehicles, the economical use of hot and cold currents determines the vehicle's performance and cruising range as well as the service life of the battery. Integrated thermal management is therefore a prerequisite for the ongoing development of e-mobility.

With the acquisition of Behr Hella Service, MAHLE Aftermarket will become a full-line supplier in the area of thermal management and thus provide comprehensive support for workshops.

What will happen to the name Behr Hella Service?

The name Behr Hella Service GmbH will no longer exist from 2020.

Under what brand name will Behr Hella Service market its products in the future?

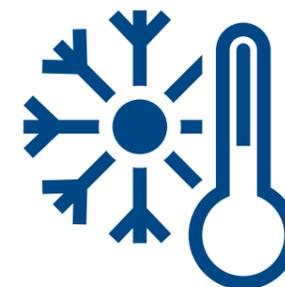

From 2020, products will be distributed under the BEHR sales brand and the MAHLE umbrella brand. The familiar PREMIUM LINE and Standard product categories will also be retained. PREMIUM LINE will comprise products produced by BEHR, AKG, Visteon, and other manufacturers with OE competence—an ideal solution for customers who expect the best. Products without the PREMIUM LINE prefix offer good performance and represent a cost-effective solution with an excellent price/performance ratio.

Will it still be possible to order the Behr Hella Service products using the usual part numbers?

Customers will still be able to order products using the existing part numbers in 2020. New part numbers based on MAHLE's numbering system will be introduced in parallel. Both numbers will appear on MAHLE orders, bills of delivery, and invoices as well as in TecDoc. Soon, there will be a transition from the Behr Hella Service to the MAHLE part numbers.

Which thermal management products and solutions come from MAHLE Aftermarket?

You can obtain thermostats, switches, sensors, air conditioning compressors, and cabin filters from MAHLE Aftermarket. A comprehensive diagnostics and workshop equipment range is also available.

Our new labeling for engine cooling & air conditioning

Which products come from Behr Hella Service?

Behr Hella Service covers the areas of engine cooling and air conditioning with products such as coolant coolers, charge air coolers and other heat exchangers, expansion tanks, water pumps, oil coolers, fans, Visco® fan drives and fan clutches, air conditioning condensers, filter-driers, expansion valve and orifice tube systems, evaporators, air conditioning compressor oils, and air conditioning compressors—to name just some of the key components.

Does MAHLE also aim for a high availability of 95%?

Naturally, we are committed to guaranteeing full supply capacity in the area of thermal management too, just as we do in MAHLE Aftermarket's other product lines. In this regard, we rely on the comprehensive experience and high efficiency of MAHLE Aftermarket's logistics.

What will happen to the existing offerings from Behr Hella Services, such as the technical service and attractive sales support?

Workshops throughout the world will receive comprehensive expertise from MAHLE Aftermarket in terms of solutions and service. This applies to existing product lines and will also apply to thermal management. Besides spare parts in proven quality and workshop equipment, we offer workshops and the parts market technical training, repair and maintenance information, and a ticketing system, in addition to an annual thermal management campaign and other promotions.
