- Strong brand in South America
- Complete aftermarket portfolio

# Our portfolio

## Engine components

Intensive research and development, many years of global OE expertise, and top quality—these are just three of the many reasons why MAHLE engine components are fitted in millions of vehicles worldwide.

## Engine peripherals

From cylinder head covers and air intake modules to oil mist separators, our portfolio also includes high-quality, reliable engine peripheral components for a growing market segment.

## Gaskets

Our range of gaskets covers over a million applications worldwide, from simple gasket shapes to complex multilayer steel designs subject to exceptionally high stresses.

## Filters

Whether in oil and fuel lines, transmissions, or vehicle cabins, MAHLE filters ensure cleanliness and long service life in air and fluid flows.

## Engine cooling & air conditioning

For the mobility of today and tomorrow: our comprehensive thermal management range covers all areas of vehicle cooling and air conditioning, from air conditioning compressors to e-water pumps.

## Starter motors & alternators

Perfect starts and powerful energy generation: starter motors and alternators from MAHLE combine extreme resilience and performance with highly compact designs.

## E-mobility & electronics

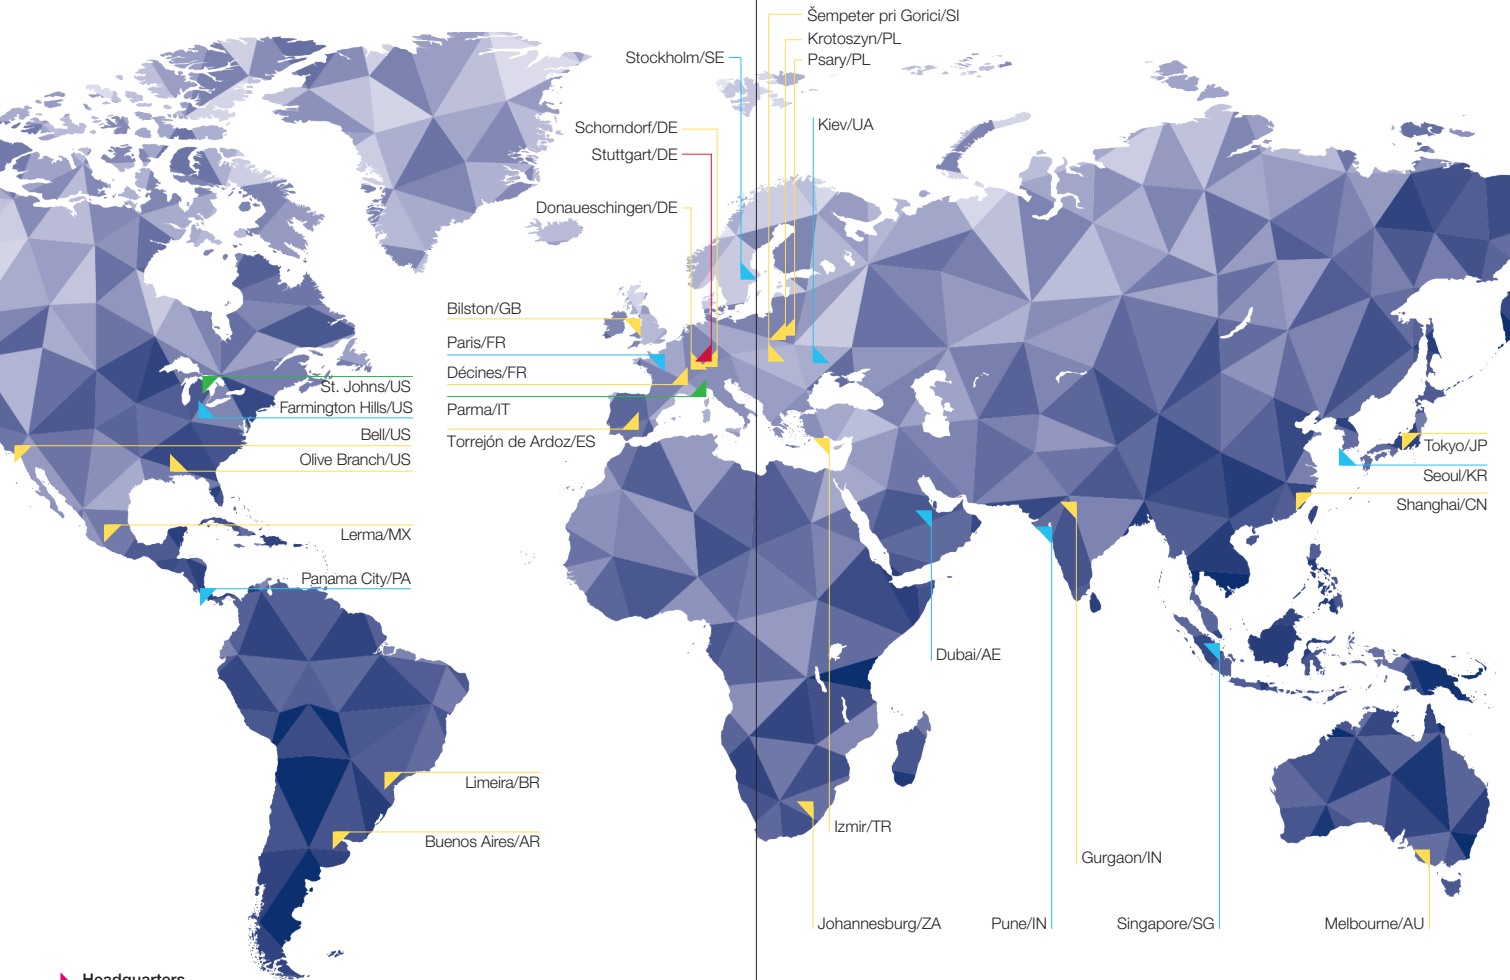

From electric motors to control and power electronics and charging cables, MAHLE offers a large and continuously growing portfolio of innovative components and complete solutions for the mobility of the future.

## Workshop equipment & diagnostics

Efficient solutions for maintenance and service: MAHLE workshop equipment supports specialized companies with equipment for vehicle diagnostics, maintenance, repair, and testing.
