

More protection for all FFP2 masks from MAHLE

As a manufacturer of vehicle filters in original equipment quality, MAHLE is a global partner to the automotive industry. In view of the global SARS-CoV-2 pandemic, we have converted part of our production in St. Michael/Austria to the manufacture of high-quality FFP2 masks. In this way, we hope to help as many people as possible to better protect themselves against COVID-19.

When worn properly, the FFP2 face masks from MAHLE filter out at least 94% of viruses, bacteria, and other particles from the air, effectively reducing the risk of infection for the wearer and others.

Benefits of MAHLE FFP2 masks:

- Manufactured by MAHLE in Austria to the highest quality standards using breathable, skin-friendly materials from Germany.
- Compliant with EU standard EN 149 and CE marking 0158 through DEKRA certification.
- Designed for a single use over several hours.
- Available in cartons containing ten individually and hygienically packed masks and two mask extenders.
- Easy to fit thanks to the 3D design and individually adjustable nose bridge. The two practical mask extenders included in each pack provide additional comfort.
