E**MAHLE Clevite Inc. Increases Presence at the 2013 AAPEX Show with Expanded Booth Display Including MAHLE RTI Automotive Maintenance Equipment**

Farmington Hills, Michigan, October 17, 2013 – MAHLE Clevite Inc. has expanded its booth display at this year's AAPEX Show, more than doubling the size of last year's booth. The larger booth size provides MAHLE Clevite with more room to highlight its full range of products and exemplify its commitment to the North American automotive aftermarket.

MAHLE Clevite Inc. AAPEX booth (No. 3461) extends across an aisle on the show floor, dividing the company's product offerings into two distinct sections. One section features MAHLE Clevite engine components and systems, including gaskets, pistons, piston rings, engine bearings and other heavy duty and performance products. The other section features MAHLE Clevite products that appeal to traditional distribution channels, including filters, turbochargers and thermostats, as well as MAHLE RTI automotive maintenance equipment for air conditioning service, fluid exchange and nitrogen tire inflation systems.

"The decision to more than double the size of our booth in comparison to last year allows us to distinctly showcase our full line of products, as well as integrate new MAHLE RTI equipment into our exhibit," said Ted Hughes, Manager – Marketing for MAHLE Clevite. "The acquisition of RTI Technologies has allowed us to expand our business into the repair shop equipment sector of the automotive aftermarket, and we're thrilled to be extending our reach with the AAPEX audience by displaying a greater range of our product offering at this year's show."
