

MAHLE

Our range of filters
for alternative drives

MAHLE[®]

We shape future mobility

Low-emission vehicles are gaining ground. Whether powered by electricity, natural gas, or solar power, one thing is certain—we need sustainable mobility.

With our dual strategy, we're playing an active role in shaping this future and developing pioneering filtration solutions for alternative drives such as fuel cell and high-voltage battery systems.

Every powertrain technology
needs filtration

That's why we already offer future-oriented solutions today.
Find out more in our e-shop or at mahle-aftermarket.com.
