

**Top-notch A/C service at low cost: new ArcticPRO® entry-level units from MAHLE Service Solutions**

- A/C service with proven MAHLE quality
- E<sup>3</sup> technology for an ecological, economical, and efficient A/C service
- Compact units for mobile applications

Stuttgart, March 8th, 2018 – MAHLE Service Solutions now offers repair shops two new entry-level models in its proven ArcticPRO® line of A/C service units. MAHLE's operating line for repair shop equipment is rounding out its A/C product range with the ACX 110 for R134a refrigerant and the ACX 210 for R1234yf refrigerant.

Both inexpensive entry-level units in the ArcticPRO® line deliver reliable A/C servicing performance for every repair shop. The new ACX 110 and ACX 210 A/C service units are particularly lightweight and compact and are therefore ideally suited for mobile applications. Every model in the product line also features MAHLE's E<sup>3</sup> technology: based on three modules, this technology makes A/C servicing ecological, cost-effective, and efficient for repair shops.

“With our entry-level units, we offer our repair shop partners highly cost-effective products for A/C servicing that feature the MAHLE quality customers are accustomed to,” says Olaf Henning, Managing Director of MAHLE Aftermarket GmbH. And these models have many proven features from the ArcticPRO® product line to boot: for example, remote diagnosis and service are integrated in the unit as standard. By means of an online connection, repair shop experts can control and monitor different components, diagnose malfunctions, and implement software updates—anytime, anywhere.

Repair shops can also upgrade their ACX 110 or ACX 210 with a range of add-on functions, such as hose extensions and special databases, making it possible to service air conditioning systems in large equipment such as construction machines and agricultural vehicles.

Customers who opt for a unit from the ArcticPRO® line also benefit from an efficient service network in Europe, as well as technical support, instruction, and training.

**About MAHLE**

MAHLE is a leading international development partner and supplier to the automotive industry as well as a pioneer for the mobility of the future. The group's product portfolio addresses all the crucial issues relating to the powertrain and air conditioning technology—both for drives with combustion engines and for e-mobility. In 2016, the group generated sales of approximately EUR 12.3 billion with about 77,000 employees and is represented in 34 countries with 170 production locations.

**About MAHLE Aftermarket**

MAHLE Aftermarket, the business unit specialising in spare parts, uses the expertise from the series production of original equipment in its automotive aftermarket product range, and supplies trade, repair shop, and engine repair partners. MAHLE Aftermarket is represented at 24 locations and other sales offices worldwide, with 1,555 employees. In 2016, the business unit achieved a global sales volume of EUR 899 million.

**About MAHLE Service Solutions**

The MAHLE Service Solutions product division combines MAHLE expertise from numerous corporate product lines: with MAHLE Behr, the Stuttgart-based supplier has been a development partner and original equipment supplier for more than 25 years to a wide variety of OEMs worldwide in the vehicle air conditioning

sector. As an innovative supplier, MAHLE Powertrain manufactures testing and diagnostic systems for the automotive industry. U.S.-based RTI Technologies, which is part of the MAHLE Group, specializes in A/C service units and fluid exchange systems. This comprehensive know-how and the many years of expertise feed into the product portfolio of MAHLE Service Solutions. The portfolio not only guarantees repair shops replacement parts in original equipment quality, but also complete solutions for repair shop equipment with a focus on engine and thermal management.
